Phillip Martin Medrano

https://github.com/setclockpm

My name is Phillip Medrano
I've been developing for 6+ years
I have a Computer Science degree
I have an above-average artistic sense
I have exceptional communication skills
I thoroughly understand good UX principles[*]
I have a grasp of core computer science fundamentals
I can thrive working on any part of the stack, front to back.
[*]And practice them!

Languages & Frameworks

Rails, AngularJS, Django, ASP
Ruby, HTML, Java, C/C++, VB Script
Python
CSS
  SCSS
Javascript
  jQuery, CoffeeScript
PostgreSQL, MySQL, Redis

Honorable Mentions

apache2, bash, bundler, Bootstrap, Capistrano, capybara, CentOS, deface, FreeBSD, git, guard, homebrew, json, Mac OS, nginx, passenger, Photoshop, pow, rbenv, rspec, rvm, spree_commerce, ssh, ssl, Ubuntu > 8.04, unicorn, vim, Windows, xml and ...
AND
I can speak the languages of the technical and non-technical sides of the meeting room really well, which is vital in situations where detailed technical consultation or specific business requirements can be prone to being ambiguous or unclear to the other party.

Recent Freelance Projects

https://porthoshome.com

Currently building out the administrative portion of this website with the goal of becoming a fully-fledged e-commerce website this year. Runs un Spree Commerce's engine. This has involved forking a few gems as well as writing custom API clients of companies such as SellerCloud to manage and quickly import inventory data.

Recent Full Time Employment

Ceatus Media Group – Software Engineer

Out of the multitude of useful tools I created, my biggest accomplishment was the project management system built in to the company's proprietary application. It managed everything from employee, correspondence to time/labor management and task delegation.
